

# AGI SOFTWARE SERVICES: AGI IMPLEMENTATION SERVICE

## IMPLEMENTATION SERVICE

AGI provides a product implementation service to assist the development of applications that incorporate AGI technology. AGI will work with you to create a prototype of your application, based on your requirements. Using the prototype as a training tool, AGI will lead your team through a tailored, private version of the week-long Programmers' Workshop training course at AGI's Exton, PA, headquarters. Our goal will be to enable your team to extend the prototype, using the knowledge gained through interaction with AGI engineers and our hands-on training. Further support from AGI can be provided as necessary.

## INCLUDES:

- Review of design requirements
- Prototype application
- Programmers' Workshop Training (using prototype)
- Scheduled follow-up or additional development support

## PROVISIONS:

- Firm, fixed-price
- AGI teaches your team to use AGI development products and integration best practices
- Your team develops a final version with minimal reliance on AGI
- AGI focuses on the use of AGI products
- All travel and living expenses are included

For more on AGI's Implementation Service or to enroll, contact your AGI representative at **1.800.220.4785** (toll-free in U.S./Canada) or **1.610.981.8000** or visit [www.agi.com/services](http://www.agi.com/services).
