

Get immediate access to STK and your scenarios in a browser, wherever you go, and on any computer.

STK Cloud is software-as-a-service that enables you to access STK from any internet connected computer, on any OS platform, with no downloaded licenses or software to maintain.

- Use STK on Windows, MacOS, or Linux.
- Eliminate the concern of local workstation performance limitations.
- Use a majority of the analysis and visualization tools available to STK on the desktop.
- Take advantage of secure, cloud-hosted content management and collaboration with the STK Data Federate – make your scenarios, models, and other content accessible anywhere to authenticated users.

STK Cloud using Safari for MacOS

Use Cases

- Access your work anywhere you have an internet connection for ad-hoc analysis away from your desk, in presentations, or during working meetings.
- Make STK accessible for users on networks with security restrictions that prevent or delay the installation of desktop STK.
- Run STK on any operating system, including MacOS.
- Teach with STK without worrying about installation and licensing.
- Try the new version of STK before upgrading your primary license.

Key Value Points

- Provides a completely portable way to use STK.
- Ensures you are using the latest version of STK.
- Eliminates the need to install and maintain licenses.

Get Started

STK Cloud is available by subscription at stkcloud.agi.com, and to existing customers with Enterprise License Agreements.

Technical Requirements

STK Cloud requires:

- An agi.com account
- An HTML5-capable browser (IE is not supported)
- A fast, stable internet connection that allows web-socket connections
